At VISION 2011

Concept · Facts · Statement

The concept

Are you a system integrator and would not like to miss VISION 2012, the world's leading trade fair for machine vision? Then we have the right offer for you.

Present your products and services at the new VISION Integration Area, which is arranged according to themes. There you can introduce your company, your competence and your know-how without any great effort regarding organisation and staff, and for an unbeatable package price. Your presentation during VISION couldn't be simpler and more favourable!

The facts

- 24 % of the visitors to VISION 2011 said they were end customers respectively end users.
- 22 % of all visitors to VISION are, by their own account, looking for ready-for-use machine vision systems for inspection, robot guidance, quality assurance and identification.

The statements

"The concept of the integration area is a complete success. Although VISION is primarily an international component trade fair, the right visitors come to our stand. We have also made many new contacts, potential customers looking for specific solutions."

Katrin Pape (CTMV)

"VISION is absolutely the leading trade fair in Europe. As a system integrator active on a European level, we are naturally exhibiting in the integration area, where we are presenting our special know-how in the automobile, medical and clock-making industries."

Dr. Hans J. Grossmann (Compar)
